8x 100/1000Base-T + 2x100/1000Base-X **SFPManaged Ethernet Switch**

ITP-G800M

8x 100/1000Base-T Managed Ethernet

ITP-G802SM series are managed industrial grade Gigabit switches with 8 10/100/1000Base-T ports and/or 2 Gigabit/Fast Ethernet SFP ports that provide stable and reliable Ethernet transmission. The ITP-G802SM series provide advanced Ethernet functions that include STP/RSTP/MSTP/ ITU-T G.8032 ERPS and multiple µ-Ring for redundant cabling, layer 2 Ethernet IGMP, VLAN, QoS, Security, IPv6, bandwidth control, port mirroring, cable diagnostic and Green Ethernet.

Housed in rugged DIN rail or wall mountable enclosures, these switches are designed for the harshest environments. Specifically, ITP-G802SM series switches use M12 connectors to ensure water tight, robust connections and to guarantee reliable connections against environmental disturbances, such as vibration and shock. ITP-G802SM series are compliant with EN 50155, covering power input voltage, surge, EFT, ESD, vibration, shock, thus making the switches suitable for industrial applications, such as vehicle, rolling stock, ship, vessel.

ITP-G802SM series are IP67 rated to protect against dust and water submersion. They are particularly used in environments with extreme temperature, high humidity, oil, dust and in outdoor environments requiring water-proof applications such as IP surveillance, city security. ITP-G802SM series can also work with CTC Management platform SmartView $^{\text{TM}}$ to provide convenient, real-time and centralized device management.
